

How to accept general terms and conditions of RFCs in PCS

▼ Content

Introduction

In case a freight Applicant selects a PaP into its dossier in order to be able to submit Path Request, every involved Applicant has to accept the general terms and conditions of the corridor. In case of multi corridor request, the Applicant has to do it as many times as many corridors exists and it uses in the dossier. The acceptance is valid for one timetable period. In a new timetable period, the Applicant should accept the terms again. Applicant should accept it per corridor and per dossier.

Acceptance of general terms and conditions should be done by the Applicants in the following way:

Section	Applicant	Acceptance
Feeder	Applicant1	Not necessary
PaP - RFC1	Applicant2	Necessary for RFC1
PaP - RFC2	Applicant3	Necessary for RFC2
Outflow	Applicant4	Not necessary

How to do it in PCS

Control

If the Applicant has PaPs in the dossier and it didn't accept yet the General terms and conditions (GTC) of the particular corridor, it will see a new type of warning below the acceptance indicators. Without the acceptance the Applicant won't be able to set green light in the dossier.

Complete all missing data in order to accept the dossier

- Missing acceptance of Orient/East-Med general terms and conditions ([General terms and conditions](#))

Waiting for all RUs to accept the dossier so you can submit Path Request

▼ Győr-Sopron-Ebenfurti Vasut (Cargo) ★

If the Applicant already accepted the GTC, the warning won't be visible anymore in the Control. When the user clicks on the link, the system will open a new view in Administration.

Administration

In the administration page, the user can search the states of acceptance per timetable periods. PCS will show all the used corridors on the screen.

Accepted

▾ Orient/East-Med

Not accepted

Declaration of acceptance of the rules for requesting international freight paths through the Corridor One Stop Shop (Corridor-OSS)

The applicant intends to apply for pre-arranged paths during the timetable 2018 and/or reserve capacity during the timetable 2017 and therefore gives the following declaration towards the Corridor-OSS acting on behalf of the IMs operating the RFC:

- The applicant has read, understood and accepted the Corridor Information Document (CID) and, in particular, its Book IV which states the procedures for requesting and allocating international freight paths through the Corridor One Stop Shop. Book IV of the respective Rail Freight Corridor can be found under the following link:
 - RFC Orient/East-Med (<http://www.rfc7.eu/public>)
- The applicant complies with all conditions required by applicable legislations and by the Infrastructure Managers / Allocation Body ("IMs/AB") involved in the paths it requests including all administrative and financial requirements.
- The applicant shall provide all data required for the path requests.
- The applicant accepts the provisions of the national Networks Statement (NS) applicable to the path(s) requested.

By clicking "I accept" on this box, the applicant confirms his declarations above.

I accept

Acceptance/Rejection

Any user can either accept or reject the GTC of the particular corridor, who has editing rights in PCS. As it was written above in order to submit path request (or actually to set green light) the Applicant has to accept the GTC. If the Applicant already accepted the GTC, but it changed its opinion and would like to reject, it's also possible. An applicant can reject GTC only if it didn't submit any path request yet for the particular timetable period and corridor. If the user still likes to reject GTC, he should withdraw all submitted requests.
