

Phases of Path Modification

Content

Introduction

DESCRIPTION AND DETAILS

The [Path Modification Process](#) allows the Applicants to adapt the originally agreed Active Timetable.

- To enter the Path Modification process the dossier must be in the Active Timetable phase.
- The modification can be proposed by any of the Applicants involved in the dossier for the whole validity period of the dossier or just some parts of it.
- Modification cannot be performed for the days that have already expired.
- The [originator Applicant*](#) has always the right to withdraw the Modification request and go back to the Active Timetable phase

Path Alteration process contains the following phases:

- [Path Modification Conference](#) – Applicant phase
- [Path Modification Request](#) – Milestone
- [Path Modification Elaboration](#) - IM phase
- [Path Modification Offer](#) - Applicant phase

**Leading Applicant is replaced in this process dynamically by the Originator Applicant figure, which can be any participating Applicant*
