

Version 2.1.7. Changes

▼ [Content](#)

DATE

2020.06.03 - PCS EC version 2.1.7 was deployed on production, test1, test3, and test4.

CHANGES/FIXES

- Alternative origin in the first territory
- An alternative origin is set to false
- Used Catalogue Data in web services: in order users to be able to determinate the type of used PaP dossier we added catalogue_dossier_type and catalogue_process_type in UsedCatalogueData element. Also we removed optional and not used fields: corridor_catalogue_id, origin_corridor_catalogue_id, origin_catalogue_te_id.
- Excel Importer: this was the last piece of PCS that was still running on the NG version. Now, it's re-developed with the same functionality
