

Version 2.23.1 Changes

▼ [Content](#)

DATE

2021.08.19 - PCS EC version 2.23.1 was deployed on production, test1, and test4.

CHANGES/BUGFIXES:

Key No.	Brief Description	Issue type
[RNE014-4291]	Missing train parameters in the open phase in the wizard was reported by PCS Team. Whenever the user goes back to some previous step (in this case 'Train Parameters' step) in dossier wizard then the data entered in 'Applicant path' is used. That is the reason why sub-path-related data are lost later the changes made in some previous step. In order to make things more clear, we added this warning message: 'Making changes to some of the previous steps will result in the loss of the changes made in sub-paths step.' in the 'Sub Paths' step.	Story
[RNE014-4274]	Upgrade Angular version	Story
[RNE014-4281]	RFC KPI doughnut chart changes	Story
[RNE014-4283]	Improve RFC KPI horizontal bar charts	Story
[RNE014-4237]	Improve the "You are not authorized to perform this action" error message if the path request contains PaPs in the Late Path request process type. When editing the reserved capacity then we should get a 'Not authorized' error. Since the user tries to change the calendar then the message will be "You are not authorized to update the calendar".	Story

(There are no PCS EC Sprint created for this release notes.)
