

Phases of Path Request Process

▼ Content

New Path Request process contains the following phases:

Dossiers without PaPs	Dossiers with PaPs
<ol style="list-style-type: none"> 1. Open – Applicant Phase 2. Harmonization – Applicant phase 3. Path Request – IM phase 4. Path Elaboration – IM phase 5. Draft Timetable – Milestone 6. Observations – Applicant phase 7. Post-processing – IM phase 8. Final Offer – Applicant phase 9. Active timetable – Final phase 10. Closed – Archive phase 	<ol style="list-style-type: none"> 1. Open – Applicant Phase 2. Harmonization – Applicant phase 3. Pre-booking – RFC phase 4. Path Request – IM phase 5. Path Elaboration – IM phase 6. Draft Timetable – Milestone 7. Observations – Applicant phase 8. Post-processing – IM phase 9. Final Offer – Applicant phase 10. Active timetable – Final phase 11. Closed – Archive phase

For the precise names of the processes Late Path Request and Ad hoc Path Request, please check the related links area below.

"Classic phases" (Without PaPs) in New Path Request Process

Open

This phase is for opening a new Dossier for a Path Request.

Harmonization

This phase is dealing with the first offers for a Path Request and all Applicants are involved. A Path Feasibility study can be started from this point.

Path Request

In this phase, the Path Request will be submitted and the leading/coordinating IM works on the IM timetable data.

For dossiers with PaPs this phase is not available. Pre-booking will be the option.

Path Elaboration

In the Path Elaboration phase, the IMs are able to edit the Path Request. At the end of this phase, the leading/coordinating IM submits the draft timetable.

Draft Timetable

This is only a temporary phase to present the draft timetable provided by the previous phase.

Observations

In this phase, the companies are checking all the details they provided and communicate with each other to get closer to the Final Offer.

Post-processing

After the Observations phase, the companies finish the change request made in the phase before.

Final Offer

After the Post-processing phase, the Final Offer is now available. In this phase, the final document is provided. The Dossier remains in this phase until it is used in the next timetable period.

Active Timetable

When the next timetable period starts the Dossier switches into Active Timetable phase. This is the normal operation state for the timetable.

Closed

When the timetable period ends the Dossier isn't needed anymore. Therefore it switches into the Closed phase.

QUIZ

Put the phases of New Path Request in the right order
