

## Phase Open

### Content

## DESCRIPTION

- The first phase for the following processes
  - New Path Request
  - Late Path Request
  - Ad-hoc Path Request
- Any Applicant can start the creation of a completely new dossier or copy and create a new dossier from an existing one.
- By default, the Applicant that creates the dossier becomes the leading Applicant of the new or copied dossier.
  - If the Applicant changes the leading Applicant, the dossier only gets available to the new Applicant leading company

## POSSIBLE TRANSITIONS

### Transition list

- **Open -> Harmonization**
  - Who: Leading Applicant
  - Restrictions
    - Obligatory fields: Dossier name, reference point and its time, Leading IM
- **Open -> Closed**
  - Who: Leading Applicant
  - Restrictions: None

## Permissions

- **Leading Applicant**
  - Read everything
  - Write everything
- **Applicants**
  - None
- **Leading IM**
  - None
- **IMs**
  - None

## Other details

- If the Applicant uses the CNDW (Create New Dossier Wizard) tool, a draft version can be saved at any time before the new dossier is created.
- The system automatically sets the Applicant-IM pairs.
  - When the Applicant enters the operation points, the system automatically recognizes the Infrastructure Manager (IM) involved for the particular point and add him automatically as a participant IM to the dossier.
- Changing the participating companies is possible for the Leading Applicant at Phases Open, Harmonization, and Harmonization Conference.
- There is no limitation on the number of companies that can participate.
- A participating company does not have to have stops included in the timetable.
  - Other companies can also be involved in the approval process or they can have only read access, like service companies or companies with through carriages or connections to the Dossier.
- It is not compulsory under PCS for more than one Applicant or infrastructure manager to be involved in one Dossier. For example, the catalog paths of a company can also be made available via PCS.
