

Process Feasibility Study

Content

- Feasibility Study is a special process that allows the Applicants to review and work on their timetable concept with the IMs before the path request is placed.
- A precondition to start the feasibility study process by the leading Applicant is that the dossiers are in the Harmonization phase.
- Time limitations
 - Inactive dossiers in Harmonization Conference are automatically switched back to Harmonization of the original process.
 - If there was no editing of a dossier 15 days after the starting of Harmonization Conference
 - If there was no editing of a dossier 8 days after the last change in Harmonization Conference
 - These checks are switched off during from approx. mid-December until approx. mid-January.
 - Exact dates are defined in the corresponding PCS Process Guidelines
- Feasibility study process consists of the following phases:
 1. Harmonization Conference – Applicant/IM
 2. Feasibility Study Request – IM phase
 3. Feasibility Study Elaboration – IM phase
 4. Feasibility Elaboration Conference mode (optional during Path Study Elaboration) – Applicant/IM phase
 5. Feasibility Study Result – Applicant phase
- Dossier does not have to run through all of the phases mentioned above.
- Leading Applicant has always the right (except Feasibility Elaboration Conference mode) to end feasibility study in preparation or acknowledge the result and go back to Harmonization phase.
