

## Phase Published (PaP)

### Content

This is the third phase for pre-arranged path process. The dossier contains published PaP.

**Rights:** everybody has read-only access.

**Object:** published PaP for pre-constructed products search

**Control:** If it requires some changes, C-OSS withdraws the PaP dossier back to path elaboration (PaP) phase, modifies it and republishes again. Withdrawal is only possible if the PaP is not used in any active dossier.

When the PaP validity expired, it should not be published, C-OSS has to close the pre-arranged path.
