

Production, Service agency

▼ [Content](#)

There are agencies in PCS, which are actively using the system, but they are not involved in the path-related coordination. It could be production-only Applicants, Production or Service agencies.

Production-only Applicants are e.g. agencies with through coaches, or connections or other relation to the dossier. Service agencies provide services like e.g. cleaning or shunting. Production agencies provide e.g. the locomotive traction or container reloading.

These agencies have their own production-related acceptance indicators. These acceptance indicators are foreseen for commercial negotiations only. The status of these indicators does not have any influence on the timetable process. All these agencies without path-related indicators have read only access to the whole dossier all the time. Their reading access for the IM timetable is the same as for the path-related Applicants.
