

Template Manager

▼ [Content](#)

Templates in PCS are provided to offer an easy fast way, how to enter quickly often used groups of parameters or criteria to the dossier. Each PCS company can define their own templates. These templates that could be used at dossier creation process. Currently, there are two template types:

- Train parameters (for normal dossiers)
- Parameter set codes (for PaPs).

Each template is defined for the specific timetable period and for a specific IM.

For further information, please read visit the **'Parameter set codes'** and **"Train parameters"** documents
