

Search for Products

Content

The search for Products functionality is offered in the system in a different area than a quick and advanced search.

In order to search for PreArranged Paths and Catalogue PaPs ("RNE Corridor Catalogue Paths" and "Other Catalogue Paths"), the users must click "Pre-Arranged Products" button in the main menu and click "Search for PaPs" in the submenu. See below picture:

The following search criteria are available in the system:

- Timetable period*
- Type of pre-constructed product*
 - Other catalogue paths (CPs)
 - RNE corridor catalogue paths (CPs)
 - RFC pre-arranged paths (PaPs)
- Train Type

- Passenger
- Cargo
- Catalogue Path Number
- PaP ID

Timetable period is the only mandatory field to perform a search according to the exact PaP ID or an entire specific phrase. For example, if you don't remember for the whole PaP ID phrase and you want to find out the PaPs which contains this specific phrase. As usual, you type the entire phrase in the PaP ID search box, but the search result displays all PaPs which meet the properties that contain just one letter or more in the phrase. So you have to spend time to find the PaPs up among the list.

Pre-constructed Products / PaP search

Search according to the specific phrase

Add selected to new dossier

If you don't know any entire specific or exact phrase then possible to perform a search according to the "Direction", "RFC corridor" or based on more criteria, click on "More" to find out more. The precondition is to enable search button that you must select the Type of pre-constructed product first! Please note that blue bubbles with a number indicate the number of items selected as search criteria on the multi-selection drop-down list.

The table displays the search result based on the added criteria

Calendar	N...	Fl...	Type/Phase	PaP ID	Origin	Destination	De...	Arr...
(1-6)		🔗	RFC / Published (PaP)	RFC08PaP0141	Loehne (Westf) Gbf	Seelze Mitte	23:02	
(1-6)		🔗	RFC / Published (PaP)	RFC08PaP0141	Hannover Hbf	Biederitz	00:32	
(1-7)		🔗	RFC / Published (PaP)	RFC11PaP0011	LEOPOLDOV	NOVE ZAMKY	20:48	21:52
(1-7)		🔗	RFC / Published (PaP)	RFC11PaP0011	NOVE ZAMKY	STUROVO	21:54	22:25
(1-7)		🔗	RFC / Published (PaP)	RFC11PaP0013	LEOPOLDOV	NOVE ZAMKY	23:36	01:12
(1-7)		🔗	RFC / Published (PaP)	RFC11PaP0013	NOVE ZAMKY	KOMARNO	01:34	02:03
(1-7)		🔗	RFC / Published (PaP)	RFC11PaP0025	NOVE ZAMKY	KOMARNO	18:22	19:13
(1-7)		🔗	RFC / Published (PaP)	RFC28PaP0109	V SCHIIN	ESSEN, GRENIC	00:47	01:09

<input type="checkbox"/>	(1-7)		RFC / Published (PaP)	RFC28PaP0109	ROSENDAAL	KIJFHOEK NOORD	01:16	01:55
<input type="checkbox"/>	(1-7)		RFC / Published (PaP)	RFC28PaP0109	ROSENDAAL GRENS	ROSENDAAL	01:09	01:16

In the above example, we are searching for PaPs based on the direction, the corridor and weight of carriages set equal or below 2000. The table displays the list of PaPs are suitable for our search criteria. If the displayed search result is "huge" we can use more filters to narrow down the search criteria based on origin and destination. Once a filter is applied using the "Clear" filter to redisplay all of the data again.

In the search criteria result table, some columns are sortable in ascending/descending order.

Finally, before adding a pre-constructed product to a new dossier, clicking in the dossier link, a new tab opens up with extended information about the dossier. Check the below snapshot to see an example:

Links + Add new link

Dossier information Requester **RFC 04**

Dossier name	Irun-Noain-40530	Special agreements
PaP ID	RFC04PaP0026	IM details
Timetable period	2017	
Dossier type	Default	
Train type	Cargo	
Corridor	C04	

Participating companies

RFC/IM

- RFC 04 on behalf of ADIF, Administrador de Infraestructuras Ferroviarias ★

After revising the details of the dossier the tab can be safely closed. The user can then select the dossier or dossiers he needs. The button "Add selected to new dossier" becomes available. In the case the user is adding the PaP to a dossier the button will be "Add to dossier".
