

Select PaPs

▼ [Content](#)

Read below the step by step procedure or watch the following video:

[Add PaPs to an existing dossier in Harmonization](#)

[Create dossier with starting PaP selection](#)

Once the user has found the needed PaPs through the PaP Search option (Look at the document "Search for Products" to see its usage), those PaPs can be used into a new dossier or being added to a current dossier.

In the picture below we can see the election of one PaP:

- Pre-constructed Products > PaP Search

Since the user came directly from the Search PaP area, the available option is: "Add selected to new dossier".

Timetable period: 2017
 Type of pre-constructed product: RFC pre-arranged pa **1** ✓
 Train type: Cargo
 Catalogue Path Number:
 PaP ID: More ▾
 Search Reset fields

Direction: N-S **2** ✓
 RFC corridor: Atlantic, Mediterranean **2** ✓
 RFC Dossier type: All

Selected PaP →

Possible action →

Calendar	Flex...	Type/Phase	PaP ID	Origin	Destination	Depar...	Arrival
<input checked="" type="checkbox"/>	(1-3,7)	RFC / Published (PaP)	RFC04PaP0026	IRUN	NOAIN	07:14	10:17
<input type="checkbox"/>	(1-4,6)	RFC / Published (PaP)	RFC46PaP0033	ALGECIRAS	CORDOBA- EL HIGUERON	19:05	00:10

Please notice that if no dossier is clicked (chosen) the "Add selected to new dossier" button remains faded and therefore cannot be clicked. Once at least one dossier is clicked the button becomes available.

The user has the possibility of choosing more than one PaP at once. There is also the possibility of adding new PaPs later on as well.

As we pointed out at the beginning, the user can select PaPs coming from a existing dossier:

- Open Dossier > Applicant TimeTable > Add PaP

Dashboard | Pre-constructed Products | Administration

< Menu
9899 | LUX BARC
Back to: All 2016
5 | scenario 37 >

Basic Data
Train Nr. 5 **scenario 37**
New Path Request | Default | Open

Copy from template
Compare timetables
+ Add PaP
+ Add Subsidiary

Add a PaP to an existing dossier

Running days filter

13.12.2

RU Timetable

10.12.2

Geography
Calendar

Show only my agency

RU Timetable

Please notice that the availability of the "Add PaP" button is dependent on the phase and on the user company type.

In the next screen we can see that the "Add selected to new dossier" is not available. Since we are coming from an existing dossier, it is logic that the new option now is "Add to Dossier":

Timetable period: 2017
 Type of pre-constructed product: RFC pre-arranged product **1** ✓
 Train type: Cargo
 Catalogue Path Number:
 PaP ID: More ▾

Direction: N **2** ✓
 RFC corridor: Atlantic, Mediterranean **2** ✓
 RFC Dossier type: All

Possible action
Selected PaPs (coming from an existing dossier)

<input type="checkbox"/>	Calendar	Flex...	Type/Phase	PaP ID	Origin	Destination	Depar...	Arrival
<input checked="" type="checkbox"/>	(1-3,7)		RFC / Published (PaP)	RFC04PaP0026	IRUN	NOAIN	07:14	10:17
<input checked="" type="checkbox"/>	(1-4,6)		RFC / Published (PaP)	RFC46PaP0033	ALGECIRAS	CORDOBA- EL HIGUERON	19:05	00:10

Once we have selected the PaP or PaPs we need, a new step by step screen shows up for the reordering of PaPs:

1. Reorder PaPs
2. Calendar Preferences
3. Dossier-Level Data
4. Train Parameters
5. Basic Data (Only shown if we are creating new dossier from PaPs)

The below screenshot shows the first four steps since we are adding PaPs to an existing dossier.

REORDER PAPS

00:10	19:05		ALGECIRAS - CORDOBA- EL HIGUERON RU: RENFE-GL RFC Published (PaP)	PaP ID: RFC46PaP0033 Path number: 40197/6

Cancel

Also, in case we were selecting the PaPs to a new dossier, only the two PaP sections will be shown and not the dossier operation points.

By default, the PaPs are shown at the bottom of the screen. The red arrows in the picture show the possibility to position the two PaP sections at will, at the beginning or at any point in between the existing dossier operation points.

Once we have ordered properly our PaPs we can confirm the order and go to the "Calendar Preferences" step:

In the above picture, all days are selected by default. They are the ones coming from the current dossier. In the case of a new dossier from PaPs, only the available dates from the PaPs will be shown.

Clicking on the calendar icon of each section, the user can see the available dates for the PaPs section or the dossier.

PCS issues a warning message "Some of the selected days are unavailable" in the case the days are not covered by the PaP. The user has the option of removing the unavailable days (The message will disappear) or continue with the next step.

In this case, PCS will offer the user the possibility of creating subsidiaries automatically:

Clicking on "Continue creating subsidiaries" will offer a preview of the main and the subsidiaries suggested by the system:

Dossier preview

Main Timetable

11.12.2016 - 09.12.2017 (1-7)

Managed by PCS

- 11.12.2016 - 09.12.2017 (1-3)
- 11.12.2016 - 09.12.2017 (4,6)
- 11.12.2016 - 09.12.2017 (7)
- 11.12.2016 - 09.12.2017 (5)

11.12.2016 - 09.12.2017 (1-7)		Arrival	Departure		
RENE-GL		07:14		IRUN ADIF, Administrador de Infraestructuras Ferroviarias Path no: 40530 ▶ Common Train Parameters	
		10:17		NOAIN ADIF, Administrador de Infraestructuras Ferroviarias Path no: 40530 ▶ Common Train Parameters	
RENE-GL				NOAIN ★ ADIF, Administrador de Infraestructuras Ferroviarias Commercial stop	
RENE-GL		19:05		ALGECIRAS ADIF, Administrador de Infraestructuras Ferroviarias Path no: 40197/6 ▶ Common Train Parameters	
		00:10		CORDOBA- EL HIGUERON ADIF, Administrador de Infraestructuras Ferroviarias Path no: 40197/6 ▶ Common Train Parameters	
RENE-GL				EL HIGUERON ADIF, Administrador de Infraestructuras Ferroviarias Commercial stop	

Cancel Create subsidiaries

If the subsidiaries are accepted, PCS takes the user to the next step in the Wizard "Dossier-Level Data":

RU	RFC / IM
<input checked="" type="radio"/> Renfe-GL, Red Nacional ★	<input checked="" type="radio"/> RFC 04 on behalf of ADIF, Administrador de Infraestructuras Ferroviarias
<input type="radio"/> Renfe-GL, Red Nacional ★	<input type="radio"/> ADIF, Administrador de Infraestructuras Ferroviarias

015 RNE | PCS

Powered by Netcetera

This step and the "Train Parameters" one are similar to the ones in the Create New Dossier Wizard (CNDW). Please check that documentation for further details.

Finally, we said that if we are creating a new dossier, there is an extra step "Basic Data":

Dossier name	<input type="text"/> *
International train number	<input type="text"/>
Timetable period	2017
Process type	New Path Request
Dossier type	<input type="text" value="Default"/>
Train type	Passenger

This step corresponds to the first step of the Create New Dossier Wizard (CNDW). Please refer to that document for further details.
