Changes in the train parameters, appointing RU as an Applicant, introduction to TOM

Submitted by Máté Bak on 20 October, 2021 - 10:57

Dear All,

We would like to invite you to an information event, where we would present some recent changes in PCS and talk a bit about the future. Please find the agenda below. The session will be split into two parts:

- 09:00 - 11:00: train parameter changes, appointing an RU as an Applicant
- 11:00 - 13:00: introduction to TOM (Train Object Model) and the route object

If you like to join only one part of the meeting, it's perfectly fine. Looking forward to seeing you!

Cheers,

Your PCS Team
